CR-150

EFFECTIVE CHECK PROCESSING FOR TELLER CAPTURE

Enhance traditional check processing with the easy-to-operate, compact Canon imageFORMULA CR-150 check transport. With high-speed, high-quality, precise processing capabilities plus reliable item handling and other useful features, the CR-150 check transport can help promote adaptability and productivity for financial applications.

WIDE RANGE OF USES

The CR-150 check transport can help assist in moving paper checks and related documents in front-counter teller settings, merchant/remote deposit capture (RDC) applications, and remittance processing, as well as more higher-volume tasks such as back-office/branch capture, lockbox applications. It enables users—in environments such as banks, credit unions, and retail—to improve their point-of-presentment applications by helping to automate funds deposits for quicker transaction times, decrease errors and fraud, improve customer service, and lower capital and processing costs.

SIMPLE, COMPACT DESIGN

Optimal for teller counters and merchant desks, the CR-150 check transport's small footprint can fit comfortably on countertops with limited workspace. The scanner is designed for easy use and has multifunction compatibility, combining the functions of many peripherals found at the teller station into one single device, thereby reducing counter space requirements and helping to improve efficiency. For added usability, the CR-150 check transport has two additional USB ports in the hub to connect to additional USB peripheral equipment such as PIN pad, receipt printer, fingerprint authentication device, and more.

RELIABLE ITEM HANDLING

Scanning up to 150 items per minute* with a 150-item Automatic Document Feeder (ADF), the CR-150 check transport can perform high-speed scanning for a wide range of document types, such as business and personal checks. It also includes a built-in ultrasonic sensor to help prevent misfeeds. To handle these, the cover of the CR-150 check transport can be opened, which also allows users access to the scanning glass and feed rollers for routine maintenance.

ROBUST, SCALABLE FEATURES

The CR-150 check transport is equipped with features for efficient check processing. To help meet strict audit regulations, the built-in, five-line imprinter prints and captures endorsement information on checks. The CR-150 check transport is also modular and scalable, with functionality that can be added as required. The CR-150 check transport also supports the most commonly used check scanning software, including the industry standard, Ranger Transport API.

PRECISE IMAGE CAPTURE

To deliver high image quality, the CR-150 check transport is equipped with image processing features such as Fine Text Filtering to allow for sharper image capture with less distortion, delivering better Optical Character Recognition (OCR) accuracy. Magnetic Optical Character Recognition (MOCR) is also used, combining Magnetic Ink Character Recognition (MICR) reading with OCR processing to capture accurate MICR data. These capabilities ensure high read rates that mitigate risks associated with digitizing checks.

ENVIRONMENT IN MIND

The CR-150 check transport meets ENERGY STAR® guidelines for energy efficiency and complies with both the EU RoHS and WEEE directives for the reduction of hazardous substances and waste products.▲ The CR-150 is EPEAT Silver certified.

DEVELOPMENT AND CUSTOMIZATION

The CR Software Development Kit (CR-SDK)▲▲ is available for those who wish to create applications that take advantage of the CR-150 scanner's array of additional capabilities. These include an advanced imprint function, an add-on function that enables printing on images only, an image quality assurance (IQA) function that checks image quality, and the ability to control applications using the buttons on the machine. An application can also be developed for the .net environment.

CR-150 MSR MODEL ONLY

Model CR-150 MSR is equipped with a magnetic reader for the reading of information on cards with magnetic stripe for expanded flexibility.

SPECIFICATIONS

Type:	Compact Check Transport		Supported OS:	Windows Vista 32-bit and 64-bit (SP2 or later); Windows 7 (SP1 or later); Windows 8.1 32-bit and 64-bit; Windows 10 32-bit and 64-bit; Windows Server 2008R2/2012R2	
Document Feeding:	Automatic		Dimensions (H x W x D):	203.6mm x 170mm x 238.2mm (8.0" x 6.7" x 9.4")	
Document Size			Weight:	Approx. 3.2 kg (7.1 lb.)	
Width:	61mm – 108mm (2.4" – 4.3")		Power Consumption:	25 W or Less (Sleep Mode: 2.7 W or Less)	
Length:	89mm – 245mm (3.5" – 9.6")		Suggested Daily Volume:	12,000 Scans*	
Document Weight			Bundled Software:	Ranger™ Transport API, Canon Scanning Utility	
Automatic Feeding:	0.003" – 0.008" (17 – 40 lb. Bond)		Compatible Ink Cartridges:**	PG-245/245XL	
Feeder Capacity:	150 Sheets		Options:	Exchange Roller Kit, Ink Disposal Tank, Magnetic Swipe Reader	
Scanning Element:	Contact Image Sensor (CMOS)		Other Features:	Auto Page Size Detection, Color Dropout/Enhancement, Fine Text Filtering, Imprinter, Border Removal, Edge Emphasis, Add-on, IQA, Contrast Adjustment, MOCR/MICR, Deskew, Color Deviation Correction, OCR, Shading Compensation, Scan Area Setting, Multistream	
Light Source:	RGB LED				
Scanning Modes:	Grayscale, Black and White, Fine Text Filtering, Error Diffusion, 256-level Grayscale, 16-level Grayscale, 24-bit Color (card scan only)				
Optical Resolution:	600 dpi				
Output Resolution:	100/120/150/200/240/300/600 dpi (600 dpi for card scanning only)				
Grayscale:	256-level, 16-level				
Scanning Speeds*	Simplex	Duplex			
Black and White:	Up to 150 cpm	Up to 150 cpm			
Grayscale:	Up to 150 cpm	Up to 150 cpm			
MICR/OCR			Item Number:		
MICR:	E13B/CMC-7				
OCR:	E13B/OCR-A/OCR-B/Check Writer/Universal Character				
Interface:	Hi-Speed USB 2.0
